Strategic Engineering Leader with a passion for transforming cross-functional teams into high-velocity units. Expert in Technologically Agnostic Leadership, successfully directing specialized teams in complex ecosystems through high-level technical mentorship and architectural oversight. Champion of operational excellence, consistently delivering accelerated time-to-market, reduced production volatility, and superior stakeholder alignment.

CORE COMPETENCIES

- **Strategic:** Agile Stewardship, Technical Recruitment, Budgetary & Resource Allocation, Stakeholder Management, Role Growth, Review & Mentorship.
- **Leadership:** Cross-functional Team Orchestration, Architecture Reviews, Process Standardization, Lean Methodology, Engineering Operations.
- **Technical:** .NET Core, C#, Microservices, RESTful APIs, Azure, Adobe Stack Technical Management (AEM, CDP, ACS, Analytics, Target, etc.), SQL, UI/UX Strategy, CI/CD Pipelines.
- **Language:** English: Native Proficiency, Romanian: Bilingual Proficiency

EXPERIENCE & ACCOMPLISHMENTS

Lead Software Developer (Acting Engineering Manager) | GoodLife Fitness

London ON | September 2023 – Present

- **Orchestrate two high-impact cross-functional teams** comprising Senior/Intermediate Developers and QA; manage a distributed team of remote developers from **coast to coast in Canada**.
- Implemented concrete software delivery & deployment standards that **increased sprint goal completion to over 90%**, directly resulting in significantly higher Product Owner satisfaction through predictable delivery.
- Established a delivery & release framework that **increased deployment visibility and transparency**. The new framework accelerated the team's time-to-market while **significantly reducing post-deployment incidents**.
- **Lead rigorous architecture proposal reviews**, ensuring scalable system design while proactively reducing the development of technical debt.
- Designed and implemented custom coding challenges and technical interview rubrics; **mentored direct reports in the recruitment process** to elevate internal skillsets.

Senior Full-Stack Developer | GoodLife Fitness

London ON | September 2022 – September 2023

- Acted as a **bridge between Architecture, Infrastructure, and Security** teams to **align application roadmaps** with enterprise standards.
- Served as an **advisor and coach to junior developers**, leveraging strong diplomacy and communication skills to foster a high-energy, positive team culture focused on technical excellence.
- **Conducted comprehensive peer reviews and architecture evaluations** to ensure code extensibility, reusability, and strict adherence to reference architectures.
- Identified and implemented process improvements to **drive iterative change**, gathering complex business requirements to produce high-level system design documentation.
- Managed the **development, deployment, and performance tuning** of .NET components while collaborating with QA Specialists to resolve mission-critical system issues.

Full-Stack Developer | GoodLife Fitness

London ON | December 2020 – September 2022

- Engineered **enterprise-grade web services and APIs**, owning the lifecycle from requirement definition through to national deployment and operation on Microsoft Azure.
- Designed **high-performance services** to support comprehensive web/mobile requirements.

Web Developer | GoodLife Fitness

London ON | May 2017 – December 2020

- **Led the fusion of UI/UX design with front-end and back-end technology**, resulting in optimal usability across mission-critical web applications.
- Facilitated Agile ceremonies and authored technical specifications for enterprise-wide properties.

EDUCATION

Computer Programmer Analyst | Fanshawe College

London ON | Graduated 2017

Graduated with Honors – Dean's Honor Roll
